Accessories  
Upgrades

### Key Features

#### Cross Sealer

- Servo (or pneumatic) actuated upper and lower seal bars with air strippers for enhanced seal strength and quality.
- Carriage mounted, adjustable in machine direction.
- Metal to rubber or metal to metal sealing dies.
- Changeable sealing dies available in standard and custom widths.
  - Minimum: 5mm
  - Maximum: 20mm
- Tool-less Teflon curtain adjustment.

#### Cross Cooler

- Servo (or pneumatic) operation.
- Carriage mounted, adjustable in machine direction.
- Used in conjunction with Servo Cross Sealing Module for seal stabilization to ensure high quality seal integrity.
- Changeable sealing dies
  - Minimum: 10mm
  - Maximum: 25mm
- Cross cooler should be at least 5 mm wider than the upstream sealer.
