

EZ-Stand

DATA SHEET - CONVERTING

Introducing a revolutionary flexible film innovation from Innoflex Incorporated and Hudson-Sharp. EZ-Stand is a pre-applied bottom gusset on a roll that can easily produce stand-up pouches on a VFFS machine. The EZ-Stand converted film is made on an Inno-Lok® machine with a specialized applicator to apply a bottom gusset to the film. This new technology allows VFFS machines to produce Stand-Up packages with only minor modifications to the sealing jaws. Make your laydown bags Stand-Up and Stand Out.

Key Features

- Automatic drum sFilm with pre-applied bottom gusset can be processed with a VFFS machine to produce Stand-Up pouches
- EZ-Stand film does not slow down filling speeds
- Faster fill rates than pre-made Stand-Up pouches
- Requires minor modification to VFFS sealing jaws with minimal capital investment
- EZ-Stand can be combined with Front Panel, Bag Top, Zip360, and Pour & Lok closures
- Finished gusset depth of 1.5"–3.5" or 3"–7" Open Gusset
- Front Panel widths of 4"–14"

Markets

- Frozen Foods
- Salty Snacks
- Cereal
- Candy
- Rice & Grain
- Bag-in-box replacement
