

## WASP (Wicketed Automated Stack Processor)

Attachments  
Accessories  
Upgrades

### Key Features

- Wicketed Automatic Stack Processor with wicket wire insertion, backer board insertion and front board and washer automation.
- Eliminates virtually all tedious handwork, saving costly labor and greatly reducing repetitive motion injuries.
- The unique rotary stacking wheel replaces the clamping mechanism in the conventional stacking process.
- **Wasp 15**  
12 wicket stations provide more accumulation space than conventional conveyors
- **Wasp 25**  
Automation benefits for larger format wicketed bags.
- Wicket wire insertion
- Front board and washer automation
