FOR IMMEDIATE RELEASE

POUR & LOK™ RECLOSABLE PACKAGING NOW AVAILABLE IN PRE-ZIPPERED ROLL STOCK

Green Bay, Wisconsin, February 5, 2009 – The innovative Hudson-Sharp Pour & Lok™ resealable packaging is now available in pre-zippered roll stock for form-fill-seal applications. With a century of machinery manufacturing innovation and the broadest product offering in the film converting industry, The Hudson-Sharp Machine Co.'s Pour & Lok™ pre-zippered roll stock is the latest packaging style in the Inno-Lok® pre-zippered roll stock family of resealable packaging.

Pour & Lok™ is a side gusseted, reclosable package with a press-to-close zipper located in the side gusset. Once the top of the package is opened, the gusset can be pulled out to form a pour spout. The zipper can be extended beyond the gusset into the body of the bag to make a larger opening which will allow scooping or easy pouring of the product. The specially designed foldable zipper can then close the bag while the spout remains in the extended position.

Pour & Lok™ reclosable packaging can be pre-applied to roll stock used in form-fill-seal machinery. The patented Pour & Lok™ pre-zippered roll stock can also be used in conjunction with pouch making machinery for pre-made pouches with reclosability.

Pour & Lok™ is a proprietary package design from the innovative Inno-Lok® reclosable packaging family. Inno-Lok® pre-zippered roll stock is used in form-fill-seal machinery to

produce bag top and front panel reclosable packaging. For further information on Pour & Lok™ and Inno-Lok®, or to locate a licensed Inno-Lok® film converter, contact The Hudson-Sharp Machine Co.

Headquartered in Green Bay, Wisconsin, USA, The Hudson-Sharp Machine Company also has manufacturing and sales facilities in Belgium, Brazil, Mexico, Australia and the Philippines. Hudson-Sharp builds and markets a broad line of plastic bag machinery, pouch making equipment, and pre-zippered film systems used in a variety of industries.

For additional information on Hudson-Sharp's complete line of Wicketers, Flatbelts, Bottom Seal/Clamp Stacker, Continuous Motion, Pouch and Inno-Lok® pre-zippered film systems visit their website at www.hudsonsharp.com or contact sales@hudsonsharp.com.
